CABINETRY

It's not just how attractive cabinets look; it's actually how thick they are (preferably between 2.2cm/2.4cm) and what quality of lamination or lacquer they have. In this part of the world, humidity is a challenge so the cabinet finish is not just aesthetic, it is a must-have. What adds that feeling of luxury is when a cabinet is smooth in its joinery, that's why we only use top-of-the-line Antaro and Legrobox Blum hinges.

LIGHTING AND BACKSPLASH

Often overlooked, a striking backsplash, accompanied by warm mood lighting, can truly elevate the overall elegance quotient of any kitchen. The cabinet budget is not important; we are able to unveil the ultimate glamour factor by suggesting a range of backsplashes and lighting systems that make the kitchen space memorable and enjoyable to occupy.

FLOORING

The most stunning kitchen in the world will never sizzle unless the perfect flooring is selected. It's not merely a question of budget; it's a question of taste and practicality. Whatever material is used, we study the flow of your home to offer design solutions. Even if a minimalist kitchen style is chosen, the flooring can be a dramatic contrast to add unique flair.
